

Scott Speicher Tennis Center

Florida State University
Tallahassee, Florida

Florida State University tennis courts had reached the end of their useful life and were in need of replacement.

The team of Emo Architects and Global was engaged to design and to oversee the construction of a new tennis facility.

The Scott Speicher Tennis Center features twelve tennis courts, spectator seating for 1,332 and lockers, showers, coaches offices and team rooms for the varsity tennis teams. The courts are lighted for tournament and recreation class play.
