

# Columbia Tennis Center

## Columbia, South Carolina

The City of Columbia has a tennis facility in the mid city with 14 tennis courts and a small pro shop/office.

The tennis program in the city has grown and there was a need to modernize the facility and to add spectator viewing and an exhibition court as well as other player amenities.

Tennis players prefer clay courts as they are more relaxing to play on and they will be included in the new plan. The development of subsurface irrigation has increased the efficiency, reduced water consumption and reduced maintenance costs. This new technology will be included in the proposed project design program.

Environmental lighting systems that reduce light pollution in the area will replace the older high mast lighting system.

Parking will be relocated, allowing the facility to expand to 15 field courts with a new Clubhouse/Pro Shop and Exhibition Court.
